Warnings

The following Warnings are for the safe setup, use, grounding, maintenance and repair of this equipment. The exclamation point symbol alerts you to a general warning and the hazard symbols refer to procedure-specific risks. Refer back to these Warnings.

Flammable fumes, such as solvent and paint fumes, in **work area** can ignite or explode. To help prevent fire and explosion:

- Use equipment only in well ventilated area.
- Do not fill fuel tank while engine is running or hot; shut off engine and let it cool. Fuel is flammable and can ignite or explode if spilled on hot surface.
- Eliminate all ignition sources such as pilot lights, cigarettes, portable electric lamps and plastic drop cloths (potential static arc).
- Keep work area free of debris, including solvent, rags and gasoline.
- Do not plug or unplug power cords or turn power or light switches on or off when flammable fumes are present.
- Ground equipment and conductive objects in work area. See Grounding instructions.
- Use grounded hoses only.
- Hold gun firmly to side of grounded pail when triggering into pail.
- If there is static sparking or you feel a shock, stop operation immediately. Do not use equipment until you identify and correct the problem.
- Keep a fire extinguisher in the work area.

CARBON MONOXIDE HAZARD

Exhaust contains poisonous carbon monoxide, which is colorless and odorless. Breathing carbon monoxide can cause death. Do not operate in an enclosed area.

SKIN INJECTION HAZARD

High-pressure fluid from gun, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. **Get immediate surgical treatment**.

- Do not point gun at anyone or any part of the body.
- Do not put your hand over spray tip.
- Do not stop or deflect leaks with your hand, body, glove or rag.
- Do not spray without tip guard and trigger guard installed.
- Engage trigger lock when not spraying.
- Follow Pressure Relief Procedure in this manual when you stop spraying and before cleaning, checking or servicing equipment.

PRESSURIZED EQUIPMENT HAZARD

Fluid from gun/dispense valve, leaks or ruptured components can splash in the eyes or on skin and cause serious injury.

- Follow Pressure Relief Procedure in this manual when you stop spraying and before cleaning, check or servicing equipment.
- Tighten all fluid connections before operating equipment.
- Check hoses, tubes and couplings daily. Replace worn or damaged parts immediately.

	EQUIPMENT MISUSE HAZARD
	Misuse can cause death or serious injury.
	 Do not exceed the maximum working pressure of the lowest rated system component. See Tech- nical Data in all equipment manuals.
	• Use fluids or solvents that are compatible with equipment's wetted parts. See the Technical Data in all equipment manuals. Read the fluid and solvent manufacturer's warnings.
	 Check the equipment daily. Repair or replace worn or damaged parts immediately.
	 Do not alter or modify equipment
	 Read all instruction manuals, tags, and labels before operating the equipment.
	• Use the equipment only for its intended purpose. Call your Graco distributor for information.
	• Route the hoses away from the traffic areas, sharp edges, moving parts, and hot surfaces.
	 Do not kink or overbend hoses or use hoses to pull the equipment.
	 Keep children and animals away from work area.
	Comply with all applicable safety regulations.
	BURN HAZARD
	Equipment surfaces and fluid that's heated can become very hot during operation. To avoid severe burns, do not touch hot fluid or equipment. Wait until equipment/fluid has cooled completely.
_	
S.C.	MOVING PARTS HAZARD
77	MOVING PARIS HAZARD Moving parts can pinch or amputate fingers and other body parts.
7557	
17 <u>17</u>	Moving parts can pinch or amputate fingers and other body parts.
¥7₽	Moving parts can pinch or amputate fingers and other body parts.Keep clear of moving parts.

* Use 100 mesh filter to reduce tip clogs

General Repair Information

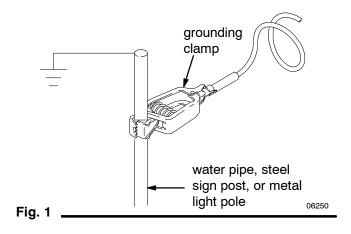

- 1. Keep all screws, nuts, washers, gaskets, and electrical fittings removed during repair procedures. These parts are not normally provided with replacement assemblies.
- 2. Test repair after problem is corrected.
- 3. **If sprayer does not operate properly**, review repair procedure to verify procedure was done correctly. If necessary, see Troubleshooting Guide, page 8, for other possible solutions.
- 4. **Install belt guard before operation** of sprayer and replace if damaged. Belt guard reduces risk of pinching and loss of fingers; see preceding **WARNING**.

Grounding

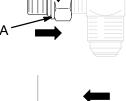

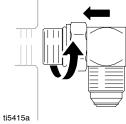

Ground sprayer with grounding clamp to earth ground when flushing sprayer. Fig. 1.

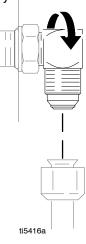

SAE O-Ring Installation

- 1. Unscrew lock nut to touch fitting.
- 2. Lubricate o-ring (A).
- 3. Screw in fitting hand tight.

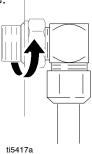

4. Unscrew fitting until oriented properly.

 Tighten lock nut to indicated torque. (Make sure washer is seated properly without pinching o-ring).

6 313776

Maintenance

Pressure Relief Procedure

- 1. Engage gun trigger safety.
- 2. Turn engine ON/OFF switch to OFF.
- 3. Move pump valve to OFF (clockwise) and turn pressure control knob fully counterclockwise.
- 4. Disengage trigger safety. Hold metal part of gun firmly to side of grounded metal pail, and trigger gun to relieve pressure.
- 5. Engage gun trigger safety.
- 6. Open pressure drain valve. Leave valve open until ready to spray again.

If you suspect that the spray tip or hose is completely clogged, or that pressure has not been fully relieved after following the steps above, VERY SLOWLY loosen tip guard retaining nut or hose end coupling to relieve pressure gradually, then loosen completely. Now clear tip or hose.

CAUTION

- Minimum hose size allowable for proper sprayer operation is 3/8 in. x 50 ft
- For detailed engine maintenance and specifications, refer to separate Honda Engines Owner's Manual, supplied.

DAILY: Check engine oil level and fill as necessary.

DAILY: Check hydraulic oil level and fill as necessary.

- DAILY: Check hose for wear and damage.
- DAILY: Check gun safety for proper operation.

DAILY: Check prime/spray drain valve for proper operation.

- **DAILY:** Check and fill gas tank.
- DAILY: Check that displacement pump is tight.

DAILY: Top off TSL level in displacement pump packing nut to help prevent material buildup on piston rod and early wear of packings.

AFTER THE FIRST 20 HOURS OF OPERATION:

Drain engine oil and refill with clean oil. Reference Honda Engines Owner's Manual for correct oil viscosity.

WEEKLY: Remove engine air filter cover and clean element and replace, if necessary. If operating in an unusually dusty environment: check filter daily.

WEEKLY/DAILY: Remove any debris from hydraulic rod.

AFTER EACH 100 HOURS OF OPERATION:

Change engine oil. Reference Honda Engines Owner's Manual for correct oil viscosity.

SEMI-ANNUALLY:

Check belt wear, page 13; replace if necessary.

YEARLY OR 2000 HOURS:

Replace hydraulic oil and filter element with Graco hydraulic oil 169236 (5 gallon/18.9 liter) or 207428 (1 gallon/3.8 liter) and filter element 246173; page 22.

SPARK PLUG: Use only BPR6ES (NGK) or W20EPR-U (NIPPONDENSO) plug. Gap plug to 0.028 to 0.031 in. (0.7 to 0.8 mm). Use spark plug wrench when installing and removing plug.

Caster Wheel

(See letter call-outs in **Parts** drawing on page 30)

- Once each year, tighten nut (127, Detail A) until spring washer bottoms out. Then back off the nut 1/2 to 3/4 turn.
- 2. Once each year, tighten nut (127) until it begins to compress spring washer. Then tighten the nut an additional 1/4 turn.
- 3. Once each month, grease wheel bearing (F).
- 4. Check pin (55) for wear. If pin is worn out, there will be play in the caster wheel. Reverse or replace pin as needed.
- Check caster wheel alignment as necessary. To align: loosen bolt (145), align wheel and tighten bolt.

Troubleshooting

PROBLEM	CAUSE	SOLUTION
Gas engine pulls hard (won't start)	Hydraulic pressure is too high	Turn hydraulic pressure knob counterclock- wise to lowest setting
Engine won't start	Engine switch is OFF	Turn engine switch ON
	Engine is out of gas	Refill gas tank. Honda Engines Owner's Manual.
	Engine oil level is low	Try to start engine. Replenish oil, if necessary. Honda Engines Owner's Manual.
	Spark plug cable is disconnected or damaged	Connect spark plug cable or replace spark plug
	Cold engine	Use choke
	Fuel shutoff lever is OFF	Move lever to ON position
	Oil is seeping into combustion chamber	Remove spark plug. Pull starter 3 to 4 times. Clean or replace spark plug. Start engine. Keep sprayer upright to avoid oil seepage.
Engine operates, but dis- placement pump does not operate	Pump valve is OFF	Turn pump valve ON.
	Pressure setting is too low	Turn pressure adjusting knob clockwise to increase pressure. Manual 311018.
	Fluid filter (11) is dirty	Clean filter.
	Tip or tip filter is clogged	Clean tip or tip filter. Manual 311254.
	Displacement pump piston rod is stuck due to dried paint	Repair pump. Manual 311845.
	Belt worn, broken or off pulley	Replace
	Hydraulic fluid too low	Shut of sprayer. Add fluid*.
	Hydraulic motor not shifting	Set pump valve OFF. Turn pressure down. Turn engine OFF. Pry rod up or down until hy- draulic motor shifts.

*Check hydraulic fluid level often. Do not allow it to become too low. Use only Graco approved hydraulic fluid, page 7.

Troubleshooting

PROBLEM	CAUSE	SOLUTION	
Displacement pump oper- ates, but output is low on up- stroke	Piston ball is not seating	Service piston ball. Manual 311845.	
	Piston packings are worn or damaged	Replace packings. Manual 311845.	
Displacement pump oper- ates but output is low on downstroke and/or on both strokes	Strainer (34e) is clogged	Clean strainer.	
	O-ring in pump is worn or damaged	Replace o-ring. Manual 311845.	
	Intake valve ball is packed with material or is not seating properly	Clean intake valve. Manual 311845.	
	Engine speed is too low	Increase throttle setting. Manual 313775.	
	Suction tube air leak	Tighten suction tube.	
	Pressure setting is too low	Increase pressure. Manual 313775.	
	Fluid filter (11), tip filter or tip is clogged or dirty	Clean filter. Manual 313775 or 311254.	
	Large pressure drop in hose with heavy materials	Use larger diameter hose and/or reduce overall length of hose. Use of more than 100 ft of 1/4 in. hose significantly reduces performance of sprayer. Use 3/8 in. hose for optimum performance (50 ft minimum).	
Pump is difficult to prime	Air in pump or hose	Check and tighten all fluid connections. Reduce engine speed and cycle pump as slowly as possible during priming.	
	Intake valve is leaking	Clean intake valve. Be sure ball seat is not nicked or worn and that ball seats well. Reas- semble valve.	
	Pump packings are worn	Replace pump packings. Manual 311845.	
	Paint is too thick	Thin the paint according to the supplier's recommendations	
	Engine speed is too high	Decrease throttle setting before priming pump. Manual 313775.	
High engine speed at no load	Misadjusted throttle setting	Reset throttle to 3700 - 3800 engine rpm at no load	
	Worn engine governor	Replace or service engine governor	
Low stall or run pressure shown on display	New pump or new packings	Pump break-in period takes up to 100 gallons of material	
	Faulty transducer	Replace transducer	

Troubleshooting

PROBLEM	CAUSE	SOLUTION
Excessive paint leakage into throat packing nut	Throat packing nut is loose	Remove throat packing nut spacer. Tighten throat packing nut just enough to stop leakage.
	Throat packings are worn or damaged	Replace packings. Manual 311845.
	Displacement rod is worn or damaged	Replace rod. Manual 311845.
Fluid is spitting from gun	Air in pump or hose	Check and tighten all fluid connections. Reprime pump. Manual 313775.
	Tip is partially clogged	Clear tip. Manual 311254.
	Fluid supply is low or empty	Refill fluid supply. Prime pump. Manual 313775. Check fluid supply often to prevent running pump dry.
Excessive leakage around hydraulic motor piston rod wiper	Piston rod seal worn or damaged	Replace these parts.
Fluid delivery is low	Pressure setting too low Displacement pump outlet filter (if used) is dirty or clogged Intake line to pump inlet is not tight Hydraulic motor is worn or damaged	Increase pressure. See manual 313775. Clean filter Tighten Bring sprayer to Graco distributor for repair
	Large pressure drop in fluid hose	Use larger diameter or shorter hose
The sprayer overheats	Paint buildup on hydraulic components	Clean
	Oil level is low	Fill with oil, page 7.
Excessive hydraulic pump noise	Low hydraulic fluid level	Shut off sprayer. Add fluid*, page 7.

Hydraulic Pump

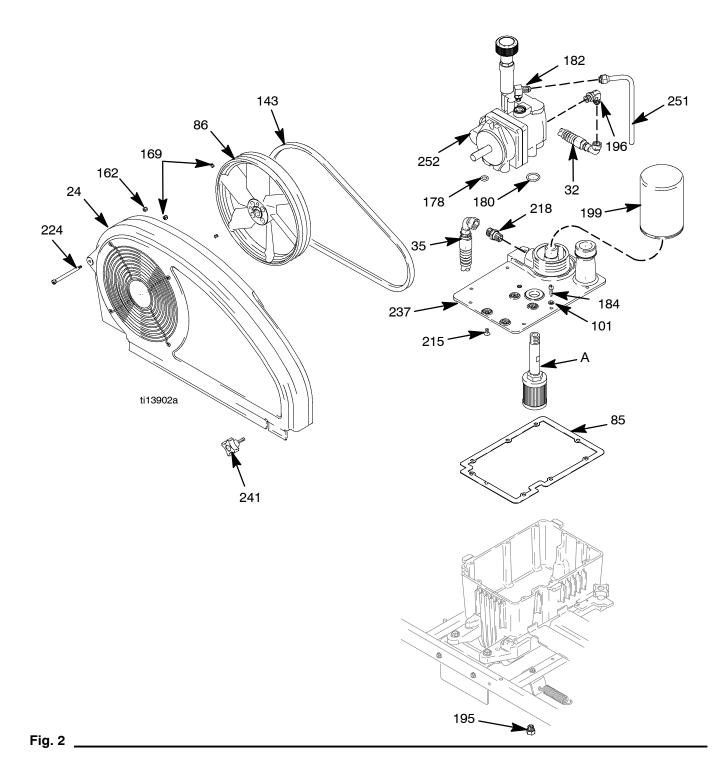

Removal

- 1. Allow hydraulic system to cool before beginning service.
- 2. Relieve pressure; page 7.
- 3. Place drip pan or rags under sprayer to catch hydraulic oil that leaks out during repair.
- 4. Remove drain plug (195) and oil filter (199) and allow hydraulic oil to drain.
- 5. Remove screw (224), loosen belt guard knob (241) and belt guard (24).
- 6. Raise motor and remove belt (143).
- 7. Remove two set screws (169) and fan pulley (86).
- 8. Remove case drain tube (251).
- 9. Remove elbow (182).
- 10. Loosen screw (184) and remove pressure control guard (63).
- 11. Loosen set screw (102) and remove remote pressure control cable (12).
- 12. Remove eight screws (184) and washers (101), reservoir cover (237), filter assembly (A) and gasket (85).
- 13. Remove four screws (215) and o-rings (178), o-ring (180) and hydraulic pump (252) from reservoir cover (237).

Installation

- Install hydraulic pump (252) on reservoir cover (237) with four screws (215) and o-rings (178), o-ring (180); torque 100 in-lb (11 N·m).
- Install gasket (85) filter assembly (A) and reservoir cover (237) with eight washers (101) and screws (184); torque 90 in-lb (10 N·m).
- 3. Install elbow (182) per instructions, page 6; torque to 15 ft-lb (20.3 N·m).
- 4. Install pressure control guard (63) and tighten screw (184).
- 5. Connect hydraulic hoses (32) and (35).
- Install case drain tube (251); torque to 15 ft-lb (20.3 N·m).
- 7. Install fan pulley (86) with two set screws (193).
- 8. Raise motor and install belt (143).
- 9. Install belt guard (24) with screw (224) and belt guard knob (241).
- 10. Install remote pressure control cable (12).Tighten set screw (102).
- Install drain plug (195); torque to 110 in-lb (12.4 N·m). Install oil filter (199); tighten 3/4 turn after gasket contacts base. Fill with Graco hydraulic oil, page 7.
- 12. Start up and allow pump to operate at low pressure for approximately 5 minutes to purge all air.
- 13. Check and top off hydraulic oil level.

Fan Belt

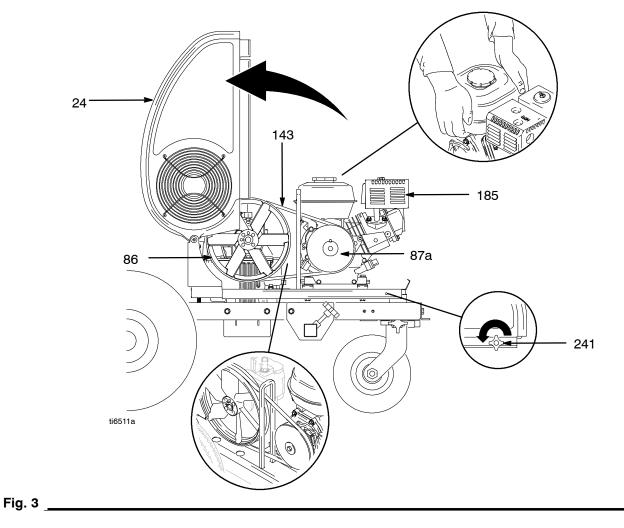

Removal

- 1. Relieve pressure; page 7.
- 2. Fig. 3. Loosen belt guard knob (241).
- 3. Rotate belt guard (24) up.
- 4. Lift engine (185) up to remove tension on belt (143).
- 5. Remove belt from fan pulley (86) and fan pulley (87a).

Installation

- 1. Thread belt (143) around fan pulley (87a) and fan pulley (86).
- 2. Lower engine (185) to put tension on belt.
- 3. Rotate belt guard (24) down.
- 4. Tighten belt guard knob (241).

Removal

- Relieve pressure; page 7. 1.
- 2. Do Fan Belt, Removal; page 13.
- Loosen hand nut (241). Swing bracket (30) out. З.
- Fig. 4. Disconnect red and black leads from engine 4. (185).
- Remove engine and rocker plate (87c) from spray-5. er.
- 6. Remove four screws (189), washers (114), washers (170) and nuts (118) and remove rocker plate, dampeners (59) and washers (114) from engine.

- 1. Install rocker plate (87c), dampeners (59) and washers (170), washers (114) on engine (185) with four screws (189), washers (170) and nuts (118); torque to 20 ft-lb (27.1 N·m).
- 2. Install engine and rocker plate (87c) on sprayer.
- Connect red and black leads. 3.
- 4. Do Fan Belt, Installation; page 13.
- 5. Swing motor retainer bracket (30) in. Tighten hand nut (241).

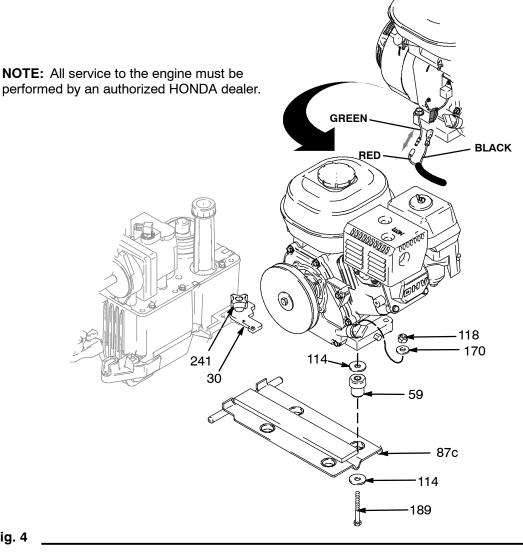

Fig. 4

Hydraulic Motor Yoke

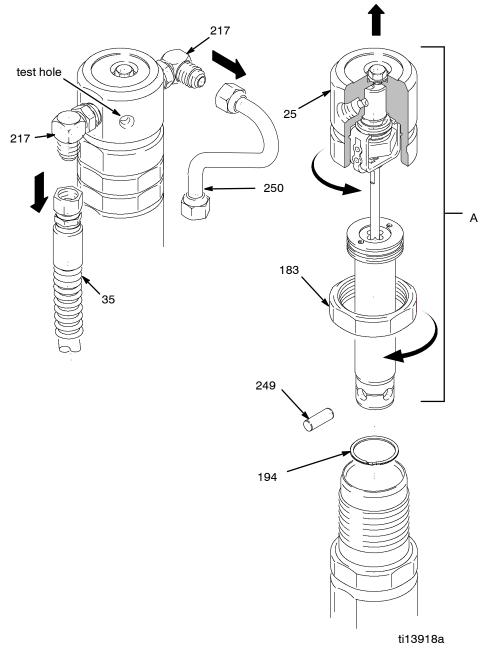

Removal

- 1. Relieve pressure; page 7.
- 2. Place drip pan or rags under sprayer to catch hydraulic oil that leaks out during repair.
- 3. Fig. 5. Slide retainer clip (194) down to remove. Remove pump pin (249).
- 4. Remove hydraulic lines (35, 250) from fittings (217) at top left and right side of hydraulic motor.
- 5. Loosen jam nut (183).
- 6. Unscrew and remove hydraulic motor cap (25).
- 7. Slide piston rod/hydraulic motor cap assembly (A) from hydraulic motor cylinder.

Installation

- 1. Slide piston rod assembly (A) into hydraulic motor cylinder.
- 2. Screw down hydraulic motor cap (25) until cap bottoms out. Unscrew hydraulic motor cap until inlet and outlet align with hydraulic line fittings and test hole in hydraulic motor cap points toward belt guard (24).
- 3. Torque jam nut (183) against hydraulic motor cap (25) to 150 ft-lb (17 N⋅m).
- Install hydraulic lines (35, 250) to fittings (217) to top left and right side of hydraulic motor per procedure on page 6; torque to 40 ft-lb (54.2 N·m).
- 5. Pull start rope slowly to align pin holes of hydraulic motor and displacement pump (21). Connect with pump pin (249); and retainer clip (194), page 18.
- 6. Start engine and operate pump for 30 seconds. Turn engine OFF. Check hydraulic oil level and fill with Graco hydraulic oil, page 7.

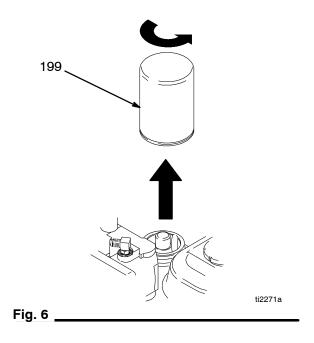

Oil/Filter Change

Removal

- 1. Fig. 6. Place drip pan or rags under sprayer to catch hydraulic oil that drains out.
- 2. Remove drain plug (195). Allow hydraulic oil to drain.
- 3. Unscrew filter (199) slowly oil runs into groove and drains out rear.

Installation

- 1. Install drain plug (195). Apply a light coat of oil to oil filter gasket and install oil filter (199). Tighten oil filter 3/4 turn after gasket contacts base.
- Fill with1.25 gallons (4.73 liters) of Graco hydraulic oil 169236 (5 gallon/20 liter) or 207428 (1 gallon/3.8 liter)
- 3. Check oil level.

Displacement Pump

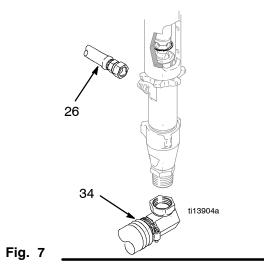

See manual 311845 for pump repair instructions.

Removal

1. Flush pump.

- 2. Relieve pressure; page 7.
- 3. Fig. 7. Remove suction tube (34) and hose (26).

4. Fig. 8. Push retaining spring (194) up. Push out pin (249).

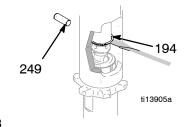

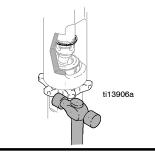

Fig. 9

5. Fig. 9. Loosen jam nut. Unscrew pump.

Installation

CAUTION

If the pump jam nut loosens during operation, the threads of the hydraulic motor manifold will be damaged. Tighten jam nut as specified.

 Fig. 10. Screw jam nut to bottom of pump threads. Screw pump completely into manifold. Unscrew pump from manifold until pump outlet aligns with hose. Hand tighten jam nut, then tap 1/8 to 1/4 turn with hammer or torque to 200 ft-lb (270 N·m).

 Fig. 11. Slowly pull engine starter rope until pump rod pin hole is aligned with hydraulic rod hole.
 Fig. 8. Push pin (249) into hole. Push retaining spring (194) into groove.

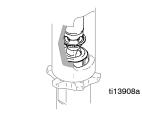

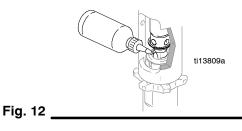

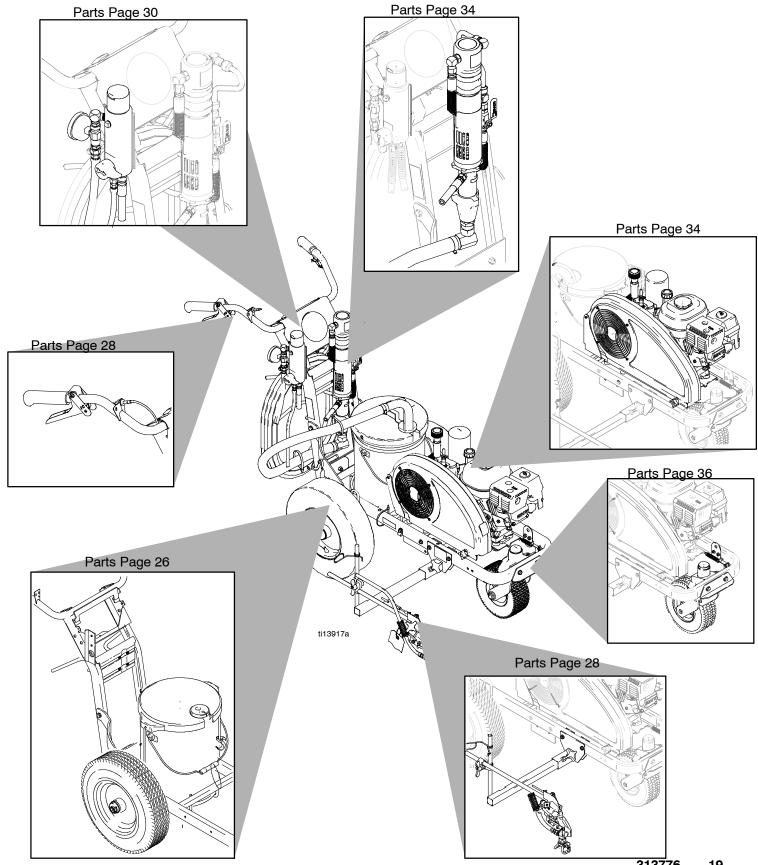

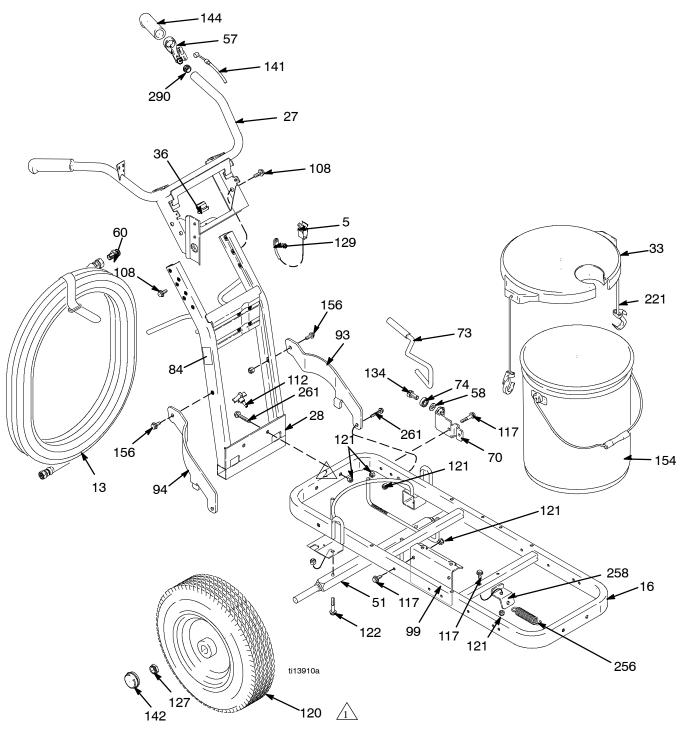

Fig. 11

Fig. 12. Fill packing nut with Graco TSL.

Graco Standard Warranty

Graco warrants all equipment manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non–Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

Graco makes no warranty, and disclaims all implied warranties of merchantability and fitness for a particular purpose in connection with accessories, equipment, materials or components sold but not manufactured by Graco. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés à la suite de ou en rapport, directement ou indirectement, avec les procedures concernées.

ADDITIONAL WARRANTY COVERAGE

Graco does provide extended warranty and wear warranty for products described in the "Graco Contractor Equipment Warranty Program".
