

NEW **Spill-Proof Pail Cover** For LineLazer!

Spill-Proof Pail Cover - Overview

Old style pail cover

Loose fit gasket holds suction set, but doesn't seal or stay in place creating numerous leak paths

Pail cover has a loose fit and sits on the pail, but does not actually seal resulting in leak paths.

New spill-proof pail cover

New Gasket is flexible and seals around suction and return line as well as the pail cover. Large over hanging lip provides stability to the gasket.

Tapered flange wedges and seals on the inside diameter to create the spill proof design. Works on 5 gallon pails as well as all Graco Hoppers

What's New?

- New Pail Cover is currently being rolled into all Graco Stripers NOW!

- New pail cover, gasket, and return line create a spill proof design
- New 90 Degree return line helps to better circulate material in pail when in recirculation mode.

- 3" plug gives the user the option of suction set location with Graco Hoppers.
- Suction Set mounted to hopper allows easy drip free filling without having to touch the suction set.

Setup Configurations (For All LineLasers)

5-Gallon Pail

- Spill proof design on standard 5 gallon Pails

15-Gallon in Hopper

- Spill proof design on standard 15 gallon Hopper
- Suction Set insertion in hopper for easy drip free filling.
- Black plug is inserted in lid

15-Gallon in Lid

- Spill proof design on standard 15 gallon Hopper
- Suction Set insertion in lid.
- Black plug is inserted in hopper

Same configuration options on LL250SPS 25 Gallon Hopper and LL250DC 15 Gallon Hoppers
